Notes:

Mr Lionel Ramamurthy, a 63-year-old, is a patient in the medical ward of which you are Charge Nurse.

Hospital: Newtown Public Hospital, 41 Main Street, Newtown

Patient details
- Name: Lionel Ramamurthy (Mr)
- Marital status: Widowed – spouse dec. 6 mths
- Residence: Community Retirement Home, Newtown
- Next of kin: Jake, engineer (37, married, 3 children <10)
  Sean, teacher (30, married, working overseas, 1 infant)

Admission date: 04 February 2014
Discharge date: 11 February 2014
Diagnosis: Pneumonia

Past medical history: Osteoarthritis (mainly fingers) – Voltaren
Eyesight ↓ due to cataracts removed 16 mths ago – needs check-up

Medical background: Admitted with pneumonia – acute shortness of breath (SOB), inspiratory and expiratory wheezing, persistent cough (chest & abdominal pain), fever, rigors, sleeplessness, generalised ache.
On admission – mobilising with pick-up frame, assist with ADLs (e.g., showering, dressing, etc.), very weak, ambulating only short distances with increasing shortness of breath on exertion (SOBOE).
Medical progress: Afebrile.
Inflammatory markers back to normal.
Slow but independent walk & shower/toilet.
Dry cough, some chest & abdom. pain.
Weight gain post r/v by dietitian.

Nursing management: Encourage oral fluids, proper nutrition.
Ambulant as per physio r/v.
Encourage chest physio (deep breathing & coughing exercises).
Sitting preferred to lying down to ensure postural drainage.

Assessment: Good progress overall

Discharge plan: Paracetamol if necessary for chest/abdom. pain.
Keep warm.
Good nutrition – fluids, eggs, fruit, veg (needs help monitoring diet).

Writing Task:
Using the information given in the case notes, write a discharge letter to Ms Georgine Ponsford, Resident Community Nurse at the Community Retirement Home, 103 Light Street, Newtown. This letter will accompany Mr Ramamurthy back to the retirement home upon his discharge tomorrow.

In your answer:
- Expand the relevant notes into complete sentences
- Do not use note form
- Use letter format

The body of the letter should be approximately 180–200 words.
Ms Georgine Ponsford  
Resident Community Nurse  
Community Retirement Home  
103 Light Street  
Newtown

10 February 2014

Dear Ms Ponsford,

Re: Lionel Ramamurthy (aged 63), for discharge from Newtown Public Hospital on 11 February 2014

Mr Lionel Ramamurthy was admitted on 4 February 2014 having contracted pneumonia. He is now ready for discharge back into your care.

On admission, he was experiencing fevers and rigors. He suffered dyspnoea, wheezing and sleeplessness. He had chest and abdominal pain due to prolonged persistent coughing.

After a week in hospital, he has stabilised and his breathing problems are now resolved. However, he still experiences some chest and abdominal pain, with a dry cough. His nursing management in hospital initially consisted of a walking frame and assistance with showering and dressing. Mr Ramamurthy is now more independent. He is also able to walk about slowly without assistance, and shower and use the toilet independently.

Mr Ramamurthy is on Voltaren for osteoarthritis. Paracetamol may be administered as needed if chest and abdominal pain persists and he should be kept warm. Please encourage oral fluids, and ensure that he sits up, rather than lies down, whenever possible to ensure postural drainage. He should ambulate regularly, and continue with deep breathing and coughing exercises.

Mr Ramamurthy was very weak on admission to hospital, but has gained weight with dietitian input. He will need ongoing monitoring of his diet to maintain a healthy BMI.

If you have any queries, please contact me.

Yours sincerely,

Charge Nurse
